More importantly, how can teachers not believe what their students say?

I SAW WHAT
U DID THERE!

BLAH! Another chapter with some good stuff...

I have a bit of bad news to share though...

As of Chapter 38 (the next chapter), I will be out of all the chapters that I pre-translated when I look into position. While that isn't great, it's not that bad. I will have to do some cleaning, re-drawing, etc., which in turn will be slower releases. This isn't just due to this though, I know when I look into position that my life gets VERY hectic and time goes so slow, that's why I got a head while I could. Now, life is back to normal and that makes me slow for the next I think. However, I am NOT stopping work, nor am I taking a break, I will continue to edit this manga as long as I can, so no worries.

What's ending up so busy? Well, I'm a good person, so I have a job, and that keeps me busy and makes me out, and I'm getting ready to build a house, which is a long, involved and expensive project. To top it off,

I'm doing some work for a local place as a favor to a friend, and that's taking up more time. I have left on the night and weekends for the next month or so, with my luck and karma, which both of them have a hard time editing. -valkrie

Anyway, this chapter has tons of bits—both inside and out. It's all about scanning completely unrelated to this stuff. Flooring. Oh lordy everyone keeps carpet, ceramic tile, wood (oh?), and the cheap linoleum (oof) stuff— but it's also getting more common to see other materials now: rock as cork and insulated concrete. Cork is quite an interesting option, but now I'm out of room.

I have no excuse for how long it took to get this chapter out, well if you discount life, work, house construction, money issues, hurricanes, classes, class, fluffy class, power outages, Computers, Deer, not in time, stapling, did I forget alpha Centauri, Spring, All, Appliance Shopping, Light selection, Dead, Planning, blah blah blah...

*I'll note for those who have no class/science,
here's an explanation of what's been going on.

It first started with the hell-bling Isaac Newton's discovery of gravity with the apple.

Then it went to Copernicus and his discovery that Earth revolved around the sun and not the other way around.

Then Reinhold tabulated Archimedes' and his discovery of buoyancy.

A better story will come from Wikipedia. http://en.wikipedia.org/wiki/Archimedes_and_the_Golden_Crown

Really, only William Fleming's right hand/leg for... Well, no matter whatsoever.

But here's a nice wiki for those who don't know. http://en.wikipedia.org/wiki/Fleming&the_Right_Hand_Role

Ohay... On the next page, I would have about the Big Bang theory. Another wiki http://en.wikipedia.org/wiki/Big_bang_theory

Grand prices refers to an astronomical event. Wiki http://en.wikipedia.org/wiki/Grand_prices

And finally I'm quoting Blake Placat with the word.

And then she quotes Sara Descartes' famous "Digits are not".

And so that's the end of the to Erika's science class!

Oh btw, I learned all this junk a few years over in school... still interesting stuff,
even if you don't see how it applies to daily life.

Maybe I'm valuing this barely cooked-the surface of a good deal of the conversations I have with friends...

oh, and Pizzas....

3. Note: Ringo is afraid of Japanese.

Call #40: Ringo takes and sudden realizations all come suddenly.

And I'll call
this theory

"Big Bang"!

Long ago...

There was
an unknown matter
that exploded,

and that created
the "universe"!

And the universe
even today
continues to expand!

Our Earth is
merely
a part of a result
of that explosion!

And Ralph, Laphar
and others before,
publishing it
in their
"Upbeat-
Society-
Science
Theory".....

Oh my God...
That's the
Big Bang theory
developed by
George
Gagarin..

You're so stupid!
Why are you in the 3 class?
Even though I wouldn't
say anything since
I'm from the 4 class.

Amazing,
stupid!

And what will
happen when
the planets of
the solar system
line up?

I'll call this...
the grand cross!

Ralph...
Laphar...
Naris...

I used to
be a scientist...

I have
something
to say.

Oh...
that
theory...

Science...
Laphar...
Where did you
learn about
cosmos
and where will
they go?

In...
I just...
thought of
something
interesting...

Am I right?

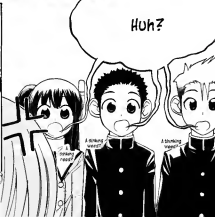

Don't you think so?

That is not a thinking race...

Get out of my sight!

Huh?

A thinking race?

Even again?
We could tell it was a relationship that was bound to fail

In the end,
this love ended in a way that I never thought it would,

I cried for days.

Even now, I still don't want to start a new relationship.
But at that time, at that moment, I was happy
